

KHASANDJON BABADZHANOV

SOFTWARE DEVELOPER

Tajikistan | bobojonovhasanjon@gmail.com | github.com/HaBov | Open to remote work & relocation

PROFESSIONAL SUMMARY

Backend-focused Software Developer building business applications, APIs, integrations, and automation. At FNF GLOBAL, delivered internal HR and operations systems from requirements and data modeling through testing, deployment, and production support. Strongest in Python, FastAPI, PostgreSQL, Docker, background processing, and third-party API integration.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL

Backend: FastAPI, Django, SQLAlchemy 2.0, Pydantic v2, Alembic, REST APIs

Data & Async: PostgreSQL, MySQL, Redis, Celery, Cloudflare D1

Infrastructure: Docker, Linux (Ubuntu), Nginx, Gunicorn, Cloudflare Workers

Testing & Tools: Pytest, smoke testing, Git, GitHub

Integrations: Telegram, RingCentral, Google Drive, PeopleForce, ClickUp, Bitrix24

PROFESSIONAL EXPERIENCE

Python Backend Developer / System Administrator

Nov 2025 - Present

FNF GLOBAL Inc | Hybrid

- Developed and deployed an internal HR platform with FastAPI, PostgreSQL, SQLAlchemy, Redis, Celery, and Docker, covering authentication, RBAC, background jobs, file storage, reporting, and audit logging.
- Built approximately 188 REST API endpoints across 11 modules and moved the platform from requirements and data modeling to a deployable MVP used in HR operations.
- Automated Telegram access lifecycle management across roughly 1,500 corporate groups, reducing manual onboarding and offboarding work and closing an access-control gap.
- Engineered a RingCentral-to-Google-Drive archival workflow processing 90,000-150,000 recordings per 90-day cycle and extending retention from 90 days to 2 years.
- Integrated Telegram attendance tracking with PeopleForce for 50-60 employees and rebuilt a fleet-safety media pipeline from about 150 to 1,500-2,000 videos per week, supported by release smoke tests.

System Analyst

May 2024 - Sep 2024

FOUR IT | Remote - Moscow, Russia

- Gathered and structured client requirements, translating operational needs into technical specifications, implementation scenarios, and CRM workflows.
- Configured Bitrix24 business-process automation and connected third-party services for client operations.

Business Process & CRM Automation Manager

May 2023 - May 2024

Nets Solutions | Dushanbe, Tajikistan

- Scoped and delivered Bitrix24 CRM and process-automation workflows, integrations, and ongoing operational support for client-specific business models.

Technical Support Specialist

Jul 2021 - Mar 2023

Alif Bank | Dushanbe, Tajikistan

- Provided first- and second-line technical support for customer-facing banking operations, diagnosing incidents and resolving requests to service-level standards.

SELECTED PROJECTS

Internal HR Operations Platform - FastAPI, PostgreSQL, Redis, Celery, Docker. Backend architecture across 11 modules with RBAC, asynchronous processing, file storage, reporting, and audit logging.

Call Recording Archive Pipeline - Python, RingCentral API, Google Drive API. JWT-authenticated export and hierarchical archiving workflow for high-volume recording retention.

Corporate Access Lifecycle Automation - TypeScript, Cloudflare Workers, D1, Telegram API. Admin workflow and policy engine for organization-wide Telegram access management.

Fleet Safety Media Delivery Pipeline - JavaScript, Cloudflare Workers, Telegram API. Webhook-driven media routing that removed a manual delivery bottleneck and scaled weekly throughput.

EDUCATION & LANGUAGES

B.Sc. in Applied Informatics - Russian-Tajik Slavonic University, Dushanbe | 2019 - 2023

Languages: Tajik - Native | Russian - Professional working | English - Intermediate (B1-B2)
